

# TOOL LIST

BUILD YOUR OWN SKERRY DAYSAILER

## REQUIRED TOOLS:

- Sacrificial clothes and shoes (they are going to get messy)
- Hearing protection
- Safety Glasses
- Dust Masks
- Work Gloves (like garden gloves) *optional*
  
- 2 pairs of pliers (1 plain old slip-joint pliers & 1 needle nose)

- Wire Cutters (diagonal cutters aka “dykes”)
- Utility knife with spare blades
- Flathead Screwdriver
- Scissors (the heavier and sharper the better)
- Putty Knife
- #2 pencils
- Ruler (6” and/or 12” are handy)
- Small saw (Japanese pull saws are great)
- Low-Angle Block Plane (Not essential, but very helpful)
- Shinto Rasp ( available at [www.woodenboatstore.com](http://www.woodenboatstore.com))
- Qty 24 - 2” spring clamps (meaning they will open 2”). At minimum bring 24... 36-40 is better. We will augment from the classroom inventory. Note that Home Depot, etc. usually have good ones for \$1/each.

This is the basic collection we will use during the class. **This list supersedes the list found in the CLC manual for home builders as well as the one found on CLC’s website.** If there are two of you working together you will want 2 each of the pliers, wire cutters, putty knives, and utility knives. The shop has tools, as will your instructor, but having your own will keep you productive rather than waiting a turn. We will provide all the consumable items for the project, such as gloves, sandpaper, mixing cups, etc. We will spend a lot of class time talking about tools and materials you’ll use to prep and paint your boats at home. Feel free to contact CLC with questions.
