

# TOOL LIST

TRAD. PLYWOOD BOAT CONSTRUCTION

W/ BILL THOMAS

A typical Introduction to Boatbuilding class starts on Sunday evenings with a brief introduction and an overview of the week ahead. Monday through Friday you'll working in the shop from 8 am until around 5 pm. Depending on how the work is progressing, there might be an evening spent in the shop as well. Saturday is a half-day, focusing on the steps involved in finishing up the boat we've built.

Please bring what you can from the attach tool list. Call or email if you have any questions. I look forward to meeting you and our week of boatbuilding.

## **SUGGESTED READING:**

- \*Building Small Boats by Greg Rossel
- \*Clinker Plywood Boatbuilding Manual by Iain Oughtred
- \*Any back issue of WoodenBoat
- Any back issue of Finewoodworking

\*Available at [www.woodenboatstore.com](http://www.woodenboatstore.com)

The following is a basic set of tools that should serve you well for all manner of woodworking, boatbuilding, etc. While **only the highlighted tools are required for Traditional Plywood Boat Construction**, if you plan on continuing your hobby, this list can serve as a guideline for a good, basic set of tools.

If you are driving and you already have any of these items (or more), please feel free to bring them along. If you are flying, you can stick to the required list, and pare it down as needed.

We will be adding a section to the resources page on our website that talks about the tools in more detail and where you can buy them.
