

WoodenBoat School

INTRODUCTION TO WOODWORKING

In this class we'll be exploring the basics of working with wood. We'll learn about hand and power tools, the properties of different woods, preparing stock and basic joinery. During the week we'll each build a shoulder style toolbox and take some time to customize it for our needs.

Bring a curious mind and questions about projects you might be planning. Below is a list of tools you will need for the class. If you are buying new tools and not sure what to buy feel free email or call me.

I look forward to meeting you and our week of woodworking. I have a blog post on tools up on my website that might be helpful. www.billthomasmaker.com Touch base if you have any questions.

SUGGESTED TOOLS:

Goggles or safety glasses

Ear protection

12" combination Square

13oz hammer

Back Saw or Japanese dozuki saw

½", ¾" and 1" chisels

Block plane. This is a tool we'll use a lot and it's nice to have a good one. We sell nice Melbourne tools in the store.

16' tape

6" steel pocket rule

Pencils, pen and notebook

Flathead and Phillips screwdrivers
