

WOODENBOAT SCHOOL TOOL LIST

INTRODUCTION TO WOODWORKING

Here is a suggested list of tools for the class. It's nice to have your own tools to work with but hard to know what to buy if your just getting started in woodworking. This should be helpful. The school also has some tools for you to use. Make sure to look at the tool offerings at the WoodenBoat Store as well, they are stocking many of the items from this list.

Touch base if you have any questions about what tools to bring.

SUGGESTED TOOLS:

Goggles or safety glasses

Ear protection

12" combination Square

4" double square

13oz hammer

Back Saw or Japanese dozuki saw

½", ¾" and 1" chisels

Block plane. This is a tool we'll use a lot and it's nice to have a good one. Look at the Lie-Nielsen, Veritas from Lee Valley or Jorgensen models.

12' tape

6" steel pocket rule

Pencils, pen and notebook

Flathead and Phillips screwdrivers
