

WOODENBOAT SCHOOL TOOL LIST

BUILD YOUR OWN JIMMY SKIFF

REQUIRED TOOLS:

- Sacrificial clothes and shoes (they are going to get messy)
- Hearing protection
- Safety Glasses
- Dust Masks
- Rechargeable drill with four (4) 1/16" drill bits
- 2 pairs of pliers (1 plain old slip-joint pliers & 1 needle nose)

- Wire Cutters (diagonal cutters aka "dykes")
- Utility knife with spare blades
- Scissors (the heavier and sharper the better)
- #2 pencils
- Ruler (6" and/or 12" are handy)

- Small saw (Japanese pull saws are great)
- Screw driver (# 2 flat head)
- Qty 24 - 2" spring clamps (meaning they will open 2"). At minimum bring 36-40 is better. We'll augment from the classroom inventory. Note that Depot, etc. usually have good ones for \$1/each.

Home

This is the basic collection we will use during the class. This list supersedes the list found in the CLC manual for home builders as well as the one found on CLC's website. If there are two of you working together you will want 2 each of the pliers, wire cutters, putty knives and utility knives. The shop we'll be working in has tools, as will I, but having your own will keep you productive rather than waiting a turn. We will provide all the consumable items for the project, such as gloves, sandpaper, mixing cups, etc. We'll spend a lot of class time talking about tools and materials you'll use to prep and paint your boats at home. Feel free to contact CLC with questions.
